An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In claim 10, line 6, "defining a" has been changed to - - defining an - -.

In claim 11, line 4, "friction" has been deleted.

In claim 12, line 4, "channel through" has been changed to - - transport conduit - -.

The following is an examiner's statement of reasons for allowance: While many of the individual components and systems claimed in claims 10-14 are known in the prior art, there is no fair teaching of combining selected disparate features from a plurality of individual references to meet the limitations of the combination claimed by applicants. That is to say, one of ordinary skill in the art could foresee so many different combinations of selected disparate features from a plurality of references that it would not be foreseeable to select the one claimed by applicants absent falling into the insidious trap of hindsight (i.e. using applicants' own disclosure as a template to assemble the references in a very particular manner to meet the claimed limitations).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
